

Serial. No. 09/911,051

IN THE CLAIMS:

- gks
- B1
1. (Presently Amended) A medical device for long-term implantation comprising:
a reservoir comprising (a) a polymer matrix and (b) an antimicrobial agent disposed within said polymer matrix, said reservoir adapted for long-term release of said antimicrobial agent from said polymer matrix; and
a surfactant region comprising a surfactant, said surfactant region disposed over said reservoir at an outer surface of said medical device,
wherein said medical device is a urine contacting device adapted for long-term implantation within the body of a patient.
 2. (Presently Amended) ~~The medical device of claim 1, wherein said surfactant is~~
A medical device for long-term implantation comprising:
a reservoir comprising (a) a polymer matrix and (b) an antimicrobial agent
disposed within said polymer matrix, said reservoir adapted for long-term release of said
antimicrobial agent from said polymer matrix; and
a surfactant region comprising a biosurfactant, said surfactant region disposed
over said reservoir at an outer surface of said medical device,
wherein said medical device is adapted for long-term implantation within the body of
a patient.
 3. (Original) The medical device of claim 2, wherein said biosurfactant is selected from glycolipids, lipopeptides, depsipeptides, phospholipids, substituted fatty acids, and lipopolysaccharides.
 4. (Original) The medical device of claim 2, wherein said biosurfactant is selected from surlactin, surfactin, visconsin and rhamnolipids.
 5. (Original) The medical device of claim 1, wherein said surfactant is a surfactant polymer.

Serial. No. 09/911,051

6. (Previously Amended) The medical device of claim 5, wherein said surfactant polymer is a surfactant polymer having a poly(vinyl amine) backbone and having hydrophilic poly(ethylene oxide) and hydrophobic hexanal side chains.
7. (Presently Amended) ~~The medical device of claim 1,~~
A medical device for long-term implantation comprising:
a reservoir comprising (a) a polymer matrix and (b) an antimicrobial agent
disposed within said polymer matrix, said reservoir adapted for long-term release of said
antimicrobial agent from said polymer matrix; and
a surfactant region comprising a surfactant, said surfactant region disposed over
said reservoir at an outer surface of said medical device,
wherein said medical device is adapted for long-term implantation within the
body of a patient, and
wherein said surfactant is linked to said outer surface by one or more interactions selected from hydrophobic interactions, ionic interactions and covalent interactions.
8. (Previously Amended) A medical device for long-term implantation comprising: (1) a reservoir comprising (a) a polymer matrix and (b) an antimicrobial agent disposed within said polymer matrix, said reservoir adapted for long-term release of said antimicrobial agent from said polymer matrix; and (2) a surfactant region comprising a surfactant, said surfactant region disposed over said reservoir at an outer surface of said device, wherein said medical device is selected from a ureteral stent and a urethral catheter.
9. (Original) The medical device of claim 1, wherein said antimicrobial agent is selected from triclosan, chlorhexidine, silver sulfadiazine, silver ions, benzalkonium chloride and zinc pyrithione.
10. (Original) The medical device of claim 1, wherein said antimicrobial agent is a broad-spectrum antibiotic.

Serial. No. 09/911,051

11. (Original) The medical device of claim 1, wherein said antimicrobial agent is an antiseptic agent.
12. (Previously Amended) The medical device of claim 11, wherein said antiseptic agent is iodine.
13. (Previously Amended) A medical device for long-term implantation comprising: (1) a reservoir comprising (a) a polymer matrix and (b) an antimicrobial agent disposed within said polymer matrix, said reservoir adapted for long-term release of said antimicrobial agent from said polymer matrix; (2) a surfactant region comprising a surfactant, said surfactant region disposed over said reservoir at an outer surface of said device; and (3) a barrier layer disposed between said polymer matrix and said surfactant region.
14. (Previously Amended) A medical device for long-term implantation comprising: (1) a reservoir comprising (a) a polymer matrix comprising a polymer selected from an ethylene-vinyl acetate copolymer and a polyurethane and (b) an antimicrobial agent disposed within said polymer matrix, said reservoir adapted for long-term release of said antimicrobial agent from said polymer matrix; and (2) a surfactant region comprising a surfactant, said surfactant region disposed over said reservoir at an outer surface of said device.
15. (Presently Amended) A method of treatment comprising:
- providing a urine contacting medical device, said urine contacting medical device comprising (a) a reservoir comprising a polymer matrix portion and an antimicrobial agent disposed within said polymer matrix portion and (b) a surfactant region comprising a surfactant, said surfactant region disposed over said reservoir at an outer surface of said device; and
- implanting said urine contacting medical device within the body of a patient for a period of at least three months.

Serial. No. 09/911,051

16. (Original) The method of claim 15, wherein said surfactant is a biosurfactant.
17. (Original) The method of claim 15, wherein said surfactant is a surfactant polymer.
18. (Cancelled) ~~The method of claim 15, wherein said medical device is selected from a ureteral stent and a urethral catheter.~~
19. (Original) The method of claim 15, wherein said polymer matrix comprises a polymer selected from an ethylene-vinyl acetate copolymer and a polyurethane.
20. (Canceled) ~~The method of claim 15, wherein said device is implanted in a urine-contacting area.~~
21. (Presently Amended) A method of constructing a medical device comprising:
forming a reservoir comprising (a) a polymer matrix portion and (b) an antimicrobial agent disposed within said polymer matrix portion; and
providing a surfactant region comprising a surfactant over said reservoir at an outer surface of said device,
wherein said medical device is a urine contacting device adapted for long-term implantation within the body of a patient.
22. (Presently Amended) ~~The method of claim 21,~~
A method of constructing a medical device comprising:
forming a reservoir comprising (a) a polymer matrix portion and (b) an antimicrobial agent disposed within said polymer matrix portion; and
providing a surfactant region comprising a surfactant over said reservoir at an outer surface of said device,
wherein said medical device is adapted for long-term implantation within the body of a patient,
and wherein said antimicrobial agent is disposed within said polymer matrix at the time of formation of said polymer matrix.

Serial. No. 09/911,051

23. (Original) The method of claim 22, wherein said antimicrobial agent is co-cast with said polymer matrix.

24. (Original) The method of claim 22, wherein said antimicrobial agent is co-extruded with said polymer matrix.

25. (Original) The method of claim 21, wherein said antimicrobial agent is provided within said polymer matrix by imbining said antimicrobial agent into said polymer matrix.

26. (Original) The method of claim 21, wherein said surfactant is a biosurfactant.

27. (Original) The method of claim 21, wherein said surfactant is a surfactant polymer.

28. (Original)

The method of claim 21, wherein said surfactant is covalently linked at said outer surface of said device.

29. (Presently Amended) ~~The method of claim 21,~~

A method of constructing a medical device comprising:

forming a reservoir comprising (a) a polymer matrix portion and (b) an antimicrobial agent disposed within said polymer matrix portion; and

providing a surfactant region comprising a surfactant over said reservoir at an outer surface of said device,

wherein said medical device is adapted for long-term implantation within the body of a patient,

and wherein said antimicrobial agent is selected from triclosan, chlorhexidine, silver sulfadiazine, silver ions, benzalkonium chloride and zinc pyrithione.

Serial. No. 09/911,051

30. Cancelled. ~~The medical device of claim 1, wherein said medical device is a urine contacting medical device.~~

31. (Presently Amended) The medical device of ~~claim 1~~ claim 7, wherein said medical device is a blood contacting medical device.

32. (Newly Added) The medical device of claim 1, wherein said medical device consists of an annular reservoir and an annular surfactant region disposed over an outer surface of said reservoir.
